NEURODIAGNOSTIC TECHNOLOGY INSTITUTE

Information contained in this catalog is subject to change at the discretion of the Neurodiagnostic Technology Institute without prior notification. Unless specifically stated otherwise in a particular catalog policy, in the event of any inconsistency or conflict between the information contained in this catalog and any other material, the information contained in the catalog shall take precedence. Neurodiagnostic Technology Institute is not responsible for information or claims made by individuals not affiliated with the institute that are contrary to Neurodiagnostic Technology Institute published catalog material.

Statement of Control

Neurodiagnostic Technology Institute is wholly owned by Virtual Learning Institute, LLC., a limited liability company formed under the laws of the State of Florida to do business. Dr. Ahmed H. Sadek is the President and Chief Executive Officer of Virtual Learning Institute, LLC. The official office mailing address is 2881 Delaney Avenue, Suite D, Orlando, Florida 32806.

Institutional License

Licensed by the Commission for Independent Education, Florida Department of Education. Additional information regarding this institution may be obtained by contacting the Commission at 325 West Gaines Street, Suite 1414, Tallahassee, FL 32309-0400, toll-free telephone number (888)224-6684.

Neurodiagnostic Technology Institute is approved to offer a Neurodiagnostic Technology certificate program which is delivered in an online environment.

In Indiana, this institution is regulated by:

Indiana Department of Workforce Development
Office for Career and Technical Schools
10 N Senate Avenue, Suite SE 308
Indianapolis IN 46204
OCTS@dwd.in.gov
<http://www.in.gov/dwd/2731.htm>

Program Recognition

Neurodiagnostic Technology Institute is recognized by the American Board of Registration of Electroencephalographic and Evoked Potential Technologists (ABRET) Neurodiagnostic Credentialing and Accreditation Program Evaluation Committee as an approved Pathway II program. Our graduates are prepared and eligible to take the ABRET EEG Registration Exam to become credentialed Registered EEG Technologists (R. EEG T.) Additional information regarding this institution may be obtained by contacting the ABRET Executive Office at 2908 Greenbriar Drive, Suite A, Springfield, IL 62704, or via telephone number (217) 726-7980

Accreditation

Neurodiagnostic Technology Institute is accredited by the Accrediting Council for Continuing Education & Training. ACCET is listed by the U.S. Department of Education as a nationally recognized accrediting agency.

Certified true and correct in content and policy. 

The contents of this document were last updated and published October 28, 2022.

WELCOME MESSAGE

It is my great pleasure to welcome you to the next phase in your education. It is my personal goal to create a flexible and affordable alternative to a traditional four-year degree. Whether you are new to the medical field or are returning to the workforce, Neurodiagnostic Technology Institute can provide you with the education and skills needed to become a Neurodiagnostic Technician in only twelve months.

Neurodiagnostic Technology Institute is much more than an online correspondence course. Our instructors are experts in their fields and committed to your success. They bring with them years of experience and a passion to teach. Each week you will have the opportunity to engage with your instructors and other students to begin building valuable relationships that will last throughout your career.

Ahmed H. Sadek
President

I am honored that you have chosen Neurodiagnostic Technology Institute to help you transition to the next stage of your career. It is a very exciting time and I am glad to be sharing the experience with you.

ABOUT US

Neurodiagnostic Technology Institute (“the Institute”) was founded by Dr. Ahmed Sadek for the purpose of providing a quality educational experience for students interested in a career in neurodiagnostic technology. Passionate about neurology, Dr. Sadek and his team seek to share their knowledge and experience with students via the modern, online classroom. Our unique method of instruction will equip students with the knowledge and skills necessary to be hired as an Electroencephalography (EEG) Technician and to confidently take the Electroencephalography (EEG) Registration Exam to become Registered EEG Technologists (R. EEG T.) Our goal is to develop the most professional and capable neurodiagnostic technologists in the industry.

MISSION

Neurodiagnostic Technology Institute’s mission is to raise the level of knowledge and professionalism in the neurodiagnostic technology field by providing high quality, convenient, and affordable education.

STATEMENT OF PURPOSE

At Neurodiagnostic Technology Institute, we have a passion for what we do and want to encourage others to join and enjoy the many benefits offered by a career in neurodiagnostic technology. We will accomplish our goals through the following:

Our Reach...

- By expanding access to neurodiagnostic training to make it more convenient for individuals limited by location or time
- By creating a unique blended-learning environment that harnesses the interactivity of the Internet and blends it with experiential learning achieved in a hands-on clinical setting
- By developing a network of local and national neurodiagnostic professionals to support new students and alumni

How We Teach...

- By leveraging technology to create an interactive and collaborative atmosphere purposefully designed to develop students’ critical thinking skills and technological savvy
- By sharing real-life experiences of seasoned neurodiagnostic physicians and practitioners in a hands-on learning environment

Frequent Testing...

- To obtain confirmation of student knowledge, understanding, and mastery of skills through frequent written and procedural testing
- To prepare students to confidently pass the Electroencephalography (EEG) Registration Exam

Raising the Standard...

- By challenging students to reach their highest potential in their knowledge, understanding, skills, and professionalism in the practice of neurodiagnostic technology
- By promoting the pillars of exceptional patient care
- By developing medical professionals who are productive employees and members of their communities

Leading the industry as the preferred neurodiagnostic technology school for students and as an employer.

GOALS

The following goals are valued by Neurodiagnostic Technology Institute. They serve as guidelines in how we conduct business, how we interact with each other, and how we engage with applicants, students, and alumni. These guiding principles include:

Neurodiagnostic Technology Institute

- To provide a neurodiagnostic technology program that is educationally sound, up-to-date, of high quality, and demonstrably effective.
- To publicly state and clearly demonstrate that the institution does not discriminate on the basis of age, race, ethnic origin, gender, sexual orientation, or religion.
- To maintain fair, ethical, and clearly stated advertising, admission, and enrollment practices by accurately and fairly representing the institution and its services to all people.
- To provide effective student services that recognize individual differences and ensure successful student retention, graduation, and employability where applicable.
- To demonstrate the ultimate benefit of private educational training programs through satisfied students.
- To ensure proper and ethical administration of all financial aspects of the institution.
- To embrace voluntary self-regulation, which is inherent to the accreditation process.
- To demonstrate the effectiveness of private educational training, thereby providing essential skills to support a productive workforce.

ADMINISTRATION

Dr. Ahmed Sadek, Neurologist & Epileptologist

Dr. Sadek, the President of Neurodiagnostic Technology Institute, is an Ivy League educated neurologist with extensive training in the field of epilepsy management. He spent two years at the University of Pennsylvania in Philadelphia, one of the principal institutions and major epilepsy centers in the country, and conducted his residency training at Baylor College of Medicine in Houston. In addition to his epilepsy fellowship, Dr. Sadek also completed a two-year neuroimaging research fellowship at the University of Pennsylvania and has authored numerous publications and several book chapters.

Dr. Sadek serves as the Director of the Orlando Epilepsy Center, Co-Director of the Epilepsy Monitoring Unit at Orlando Health, and the Director of the Clinical Neurodiagnostic Department at Orlando Health. He has taken the position of Assistant Professor of Neurology at the University of Central Florida – School of Medicine and is also the Clinical Assistant Professor of Neurology at the University of Florida Health, Shands Hospital.

Dr. Sadek is a member of the Board of Directors of the Epilepsy Association of Central Florida (EACF).

Credentials: Certified in Neurology by the American Board of Psychiatry and Neurology in 2002
Certified in Clinical Neurophysiology by the American Board of Psychiatry and Neurology in 2003
Certified in Epilepsy by the American Board of Psychiatry and Neurology in 2013

Tanya Maier, MBA, R. EEG T.

Tanya Maier is the Director of Administration at the Neurodiagnostic Technology Institute. She received a Master of Business Administration degree in Global Management from the University of Phoenix and a Bachelor of Science degree in Political Science from the University of North Florida. Prior to joining the Institute, Tanya spent many years working for one of the world's largest hotel companies where she played a key role in developing and delivering some of the most popular online training courses. Her vision of how to best use technology to teach is a driving force within the Institute.

Education: Master of Business Administration degree from the University of Phoenix
Bachelor of Science degree from the University of North Florida

FACULTY

Rhonda Jacobs, R. EEG T.

Rhonda Jacobs, R. EEG. T. and Director of Academics, has over 13 years of clinical experience in neurodiagnostic technology. She has worked with patients of all ages and many different conditions. Rhonda is passionate about the fields of Neurodiagnostic Technology and education. Her goal is to assist students on their journey towards earning a rewarding career as a Neurodiagnostic Technologist and Registered EEG Technologists (R. EEG T.).

Education: Bachelor of Arts degree from the University of Florida State University in 1999

Credentials: Registered EEG Technologist with The American Board of Registration of Electroencephalographic and Evoked Potential Technologists (ABRET) since 2012

Laura Krudo, R. EEG T.

Laura Krudo is an Instructor who began her medical career with the Respiratory department in 2004, but by 2006 she was working as an EEG technician in Central Florida hospitals. Laura is experienced in working with adult and pediatric neurological patients, but her passion lies in working with infants and children. As the Sr. Neurodiagnostic Technologist at an Orlando children's hospital, Laura has exclusively specialized in pediatric neurology for over a decade.

Education: Associate of Arts degree from Seminole State College in 2013

Credentials: Registered EEG Technologist with The American Board of Registration of Electroencephalographic and Evoked Potential Technologists (ABRET) since 2011

Abigail Carlson, R. EEG T., R. EP T., CLTM, CNIM

Originating in Minnesota, Abbey began working with both adult and pediatric patients in hospitals in the Twin Cities where she performed many neurodiagnostic recordings including long term monitoring for epilepsy patients, evoked potentials, and intraoperative neuromonitoring. Abbey continues to pursue her passion in neurodiagnostic technology and is a valued team member at Gillette Children's Specialty Healthcare specializing in pediatric emergency care.

Education: Bachelors in Science in Neurodiagnostics and Sleep Science from UNC Charlotte in 2019
Electroneurodiagnostic Technology A.A.S. from Minneapolis Community and Technical College in 2013

Credentials: Registered EEG Technologist with The American Board of Registration of Electroencephalographic and Evoked Potential Technologists (ABRET) since 2013

Registered EP Technologist with The American Board of Registration of Electroencephalographic and Evoked Potential Technologists (ABRET) since 2013

Certified in Long Term Monitoring by The American Board of Registration of Electroencephalographic and Evoked Potential Technologists (ABRET) since 2017

Jessica Morrow, R. EEG T.

Located on the Central Coast of California, Jessica started her career as a neurodiagnostic technician in 2014. Recognizing the benefits of becoming a credentialed technologist, she attended Neurodiagnostic Technology Institute to learn the concepts and theories relevant to the field. Upon graduating the NTI program, she passed the American Board of Registration of Electroencephalographic and Evoked Potential Technologists EEG Registration Exam on her first attempt to become a Registered EEG Technologist (R. EEG T.). In addition to teaching, Jessica works with adult and pediatric patients and continues to perform routine EEG recordings, long-term patient monitoring, neonatal AEEG recordings, and nerve conduction studies at Marian Medical Regional Center in Santa Maria, California. As an NTI alumna, she is eager to teach and positively influence future EEG technologists.

Education: Neurodiagnostic Technology Certificate from Neurodiagnostic Technology Institute in 2018

Neurodiagnostic Technology Institute

Credentials: Registered EEG Technologist with The American Board of Registration of Electroencephalographic and Evoked Potential Technologists (ABRET) since 2018

FACILITIES

The Institute's administrative office is located in sunny Orlando, Florida and is near Central Florida's largest hospital campuses which includes University of Florida Health Cancer Center, Winnie Palmer Hospital for Women and Babies, Arnold Palmer Hospital for Children, the Orlando Heart Center, Orlando Regional Medical Center, and AdventHealth Orlando.

Because courses are taught via the Internet, the Neurodiagnostic Technology Institute office offers sufficient space to conduct administrative tasks, standard office operations, and securely maintain student and employee records.

Our office is 160 square feet and contains standard office equipment including a computer, copier, scanner, telephone, and fax machine. There is an area to review student records, meet with the Administration and access the office's library of neurodiagnostic books and journals. Office hours are 9:30 am – 5:30 pm Eastern, Monday through Friday.

ADMISSIONS

ADMISSION REQUIREMENTS

Neurodiagnostic Technology Institute has established the following minimum eligibility admission requirements. Satisfying these minimum requirements does not guarantee admission. Admission is selective, and admitted students typically exceed the minimum requirements.

Formal application and admission to Neurodiagnostic Technology Institute is required. Admission is open to any qualified applicant. No qualified person will be excluded from enrollment based on age, race, gender, disability or national origin. Applicants must meet the following minimum requirements to be considered for admission:

School Admission Requirements:

1. Must be at least eighteen (18) years old; or, if under the age of 18, a parent or guardian must sign the enrollment application. All applicants must be at least 18 years old prior to beginning the first course.
2. Must be a high school graduate or have achieved a GED.
3. Official academic transcripts for high school / GED , and college must be provided.
 - a. Foreign Education: Foreign education is defined as education acquired outside of the United States or the District of Columbia. Foreign education must be evaluated by a credential evaluation service recognized by the U.S. Department of Education. Applicants can request an evaluation from a member organization of one of the two national associations of credential evaluation services:
 - i. National Association of Credential Evaluation Services (NACES) is an association of 19 credential evaluation services with admission standards and an enforced code of good practice. www.naces.org
 - ii. Association of International Credentials Evaluators (AICE) is an association of 10 credential evaluation services with a board of advisors and an enforced code of ethics. www.aice-eval.org

NEURODIAGNOSTIC TECHNOLOGY INSTITUTE

- b. The foreign credential evaluation must include/describe:
 - i. The type of education received by the applicant;
 - ii. The level of education in relation to the U.S. education system, and state that its comparability recommendations follow the general guidelines of the International Evaluation Standards Council;
 - iii. The content of the applicant's educational program earned abroad and the standard obtained;
 - iv. The status of the awarding foreign school's recognition and legitimacy in its home country's education system; and
 - v. Any other information of interest such as what the evaluation service did to obtain this information, the qualifications of the evaluator, and any indications as to other problems such as forgery.
 - c. Foreign credential evaluations that do not contain the above information or that state there is insufficient information provided by the applicant on which to base an evaluation will not be accepted. If the requested evaluation shows the foreign education to be legitimate and comparable to that expected of a candidate with U.S. credentials, it may be accepted at the discretion of the Institute.
 - d. Credential evaluations are not free and applicants are responsible for the cost of the service. The cost will vary according to the complexity of the case and the amount of documentation provided. Notarized English translations for any non-English documents must be obtained prior to submitting any documents to a credential evaluation service.
4. Provide valid government issued photo identification.
 5. Complete and submit the Application for Admission and pay the Application fee.
 6. Provide official scores from the TEAS assessment on an official transcript dated within 2 years of the application for admission.

Applicants must achieve an overall minimum score of Proficient (58.7%) on the TEAS – Allied Health assessment to be considered for admission.

The following applicants are exempt from this requirement:

- a. Applicants who provide official transcripts from a college or university located within the United States may be exempt if their grades are above 70% or a C;
- b. An active-duty member of any branch of the United States Armed Services.

Clinical Site Admission Requirements:

Clinical Site Admission Requirements are dictated by the hospitals and neurological facilities where students perform their externships. At a minimum, students are expected to meet the following criteria:

1. Identification and acceptance by an approved neurological clinic or hospital.
2. Provide a Certificate of Health form signed by a physician which verifies that the applicant has the following:
 - a. the ability to walk and stand for long periods of time;
 - b. the possession of above-average manual dexterity and hand/eye coordination;
 - c. good vision and hearing (or correctable to good);
 - d. the ability to lift 40 lbs.; and
 - e. is physically capable of working within a hospital environment.In addition to the above, pregnant students must obtain a separate health declaration letter signed by an obstetrician.
3. Provide proof of Basic Life Support for Healthcare Providers certification. Information about courses in your area can be found on the American Heart Association website (www.heart.org/bls) or by contacting your local hospital.
4. Provide proof of current vaccinations via StudentCheck (*approximately \$35.00, excluding taxes*) for the following immunizations: Hepatitis B; Influenza; Measles, Mumps and Rubella (MMR), Varicella; Tetanus, Diphtheria, Pertussis (Tdap); and any additional immunizations required by the clinical site. Your personal physician, local hospital, or county health department will be able to provide you with more information about how to obtain these important vaccinations.
 - a. Some clinical facilities require proof of a current, negative COVID-19 test prior to accepting a student for clinical externship.
5. Provide a negative drug screening via StudentCheck (*approximately \$46.00, excluding taxes*).

Neurodiagnostic Technology Institute

6. Pass a background check via StudentCheck (*approximately \$59.50, excluding taxes*)
7. Some facilities may require students to purchase health insurance. Student policies are relatively inexpensive when compared to non-student policies.
8. Some facilities may require students to purchase professional liability insurance.
9. Additional facility-specific paperwork may be required.

Questions about the admissions requirements should be directed to the Admissions Office at 407-601-7832.

ADMISSION PROCEDURE

Applicants must complete the admission process in a timely manner. Admission to the program is contingent upon the applicant providing complete, accurate, and current admissions information. Acceptance of the applicant into the neurodiagnostic technology program requires the successful completion and submission of all required materials, the availability of an approved clinical site, and the recommendation of the admission committee.

Official records and official transcripts should be mailed to the address listed below:

Admissions
Neurodiagnostic Technology Institute
2881 Delaney Avenue, Suite D
Orlando, Florida 32806

Applicants will be advised of their status via email. Records and transcripts received by the Institute become the property of the Institute.

ADMISSION STATUS

Upon receipt of a complete application package, the applicant's qualifications will be reviewed and assigned one of the following academic standings:

- **Approved:** Approved status will be granted to applicants who submit a complete Admissions packet in a timely manner and meet the Admission Requirements stated above.
- **Denied:** Denied status will be assigned to applicants who fail to submit a complete Admissions packet or does not meet the Admission Requirements stated above

Appeals on the decision regarding admission should be made in writing and addressed to the Director of Administration. Appeals will be heard by an administrative committee and may include a personal interview and additional documentation. Once the appeal is reviewed, the committee will render a final decision.

ENROLLMENT AGREEMENT

Approved applicants are required to complete the Institute's Enrollment Agreement. The Enrollment Agreement is a binding contract between the applicant and Neurodiagnostic Technology Institute. It defines the obligations of both parties. A signed Enrollment Agreement is valid for one year from the date signed. Students who have not started the program within this timeframe are required to reapply.

ACADEMIC CALENDAR

IMPORTANT DATES	
Application Deadlines	Sixty (60) days prior to the beginning of the first term
Clinical Site Approval Deadline	Fifteen (15) days prior to the beginning of the first term
Vaccinations Deadline	Fifteen (15) days prior to the beginning of the first term
Background Check Deadline	Fifteen (15) days prior to the beginning of the first term
Tuition Payment Deadlines	Fifteen (15) days prior to the beginning of each term

Session	Session Begins	Session Ends	Session Breaks
Winter	January 1, 2023	March 25, 2023	March 26, 2023- April 1, 2023
Spring	April 2, 2023	June 24, 2023	June 25, 2023 – July 1, 2023
Summer	July 2, 2023	September 23, 2023	September 24, 2023 – September 30, 2023
Autumn	October 1, 2023	December 23, 2023	December 24, 2023 – December 30, 2023
Winter	January 7, 2024	March 30, 2024	March 31, 2024 – April 6, 2024

ORIENTATION

New Student Orientation

Students are required to attend the New Student Orientation scheduled one week before the first term begins. The goal of orientation is to ensure that students are able to access the Institute’s Student Portal and provide them with a guided tour of the resources available within. Students are encouraged to begin networking and building alliances which will be beneficial to them throughout their career. New Student Orientation will include an overview of how to access and work within the Student Portal, including the following:

- how and where to log in to the Student Portal,
- how to complete and update the Student Profile,
- where to access the course syllabus and weekly materials,
- how and where to download course materials and upload assignments,
- how to take and submit quizzes and tests,
- how to interact online with other students and their instructors,
- where to find their grades, and
- how to get help for course materials and/or technical support.

Additionally, students will learn to identify educational resources, key administrative staff and faculty, academic standards, and how to engage with each other and their instructors throughout the upcoming year.

Clinical Site Orientation

Before beginning the program, students are encouraged to complete a one-day job shadow at the clinical site where they will be performing their externship. During this visit, students get to experience a typical day in the life of a neurodiagnostic

Neurodiagnostic Technology Institute

technologist and receive valuable information about dress code, parking, and hours of operation necessary to perform successfully at their clinical site. Students are responsible for their own meals, parking, and travel arrangements to and from the clinical site.

CURRICULUM

PROGRAM DESCRIPTION

The profession of neurodiagnostic technology is focused on the specific area of biomedical electronics used to study and record electrical activity within the brain and nervous system. The Institute's neurodiagnostic technology program is a twelve-month (1,152 clock hours) course designed to provide students with the knowledge and skills required to record human brain activity via an electroencephalograph (EEG) and confidently communicate with physicians and medical staff in a variety of settings including hospitals, medical research, and other healthcare facilities.

The curriculum focuses on anatomy, neuroanatomy, patient and personal safety guidelines, electroencephalograph instrumentation and recording methods, and clinical neurodiagnostic correlations. Class sizes are kept small with fewer than 20 students per instructor. This allows each student to receive individual attention beneficial to the learning process. Externships at clinical sites provide students with a hands-on learning environment in approved neurological facilities, including hospitals, clinics, and private practices. Fewer than five students will be sent to the same externship site at any one time to ensure sufficient time to learn the clinical portion of the program. Successful completion of the Neurodiagnostic Technology program prepares students to seek employment as Neurodiagnostic Technicians and to confidently take the American Board of Registered Electroneurodiagnostic Technologists (ABRET) EEG Registration Examination to become a Registered Electroneurodiagnostic Technologists (R. EEG T.).

OBJECTIVE

The Institute seeks to raise the level of knowledge, skills, and professionalism expected from Neurodiagnostic Technicians and Technologists. Graduates will possess the confidence and competence of more experienced technologists making them the most sought after in the industry.

UNIT OF CREDIT

Neurodiagnostic Technology Institute units of credit are based on the Clock Hour which is defined as means a period of 60 minutes with a minimum of 50 minutes of instruction under the supervision of an instructor plus a reasonable period of time outside of instruction which the institution requires a student to devote to preparation for learning experiences, such as study of course material, or completion of assignments and educational projects. The Neurodiagnostic Technology program requires 1,152 clock hours to complete.

COURSE NAMING SYSTEM

Each course is first assigned a specific, 3-character name and then a specific three-digit course number which reflects the student's progression throughout their academic path. All neurodiagnostic technology courses begin with "END".

COURSE NUMBERING SYSTEM

Courses are numbered sequentially in accordance with the student's progression through the program. The first digit represents the term the course is offered. The second and third digits designate the type of course offered.

COURSE DESCRIPTIONS

The Neurodiagnostic Technology program is comprised of 408 clock hours of theory, 40 clock hours of lab/at-home practice, and 704 clock hours of externship instruction. Students must complete 1,152 clock hours to be eligible to graduate.

NEURODIAGNOSTIC TECHNOLOGY INSTITUTE

First Term

The first term is the primary stepping stone to help students develop foundational knowledge necessary for a career in Healthcare. Course subjects consist of Introduction to Healthcare, Basic Anatomy & Medical Terminology, Emergency Preparedness, and Clinical Experience I - Introduction. These courses establish the foundation for understanding and communication for a career in the medical field.

Course Number	Course Name	Course Description	Clock Hours
END101	Introduction to Healthcare	An introductory course which provides a comprehensive overview of basic knowledge for entrance into any healthcare occupation including important topics such as patient care, HIPAA, and infection control protocols.	48 Clock Hours Theory
END102	Basic Anatomy & Medical Terminology	A foundational course which provides instruction in basic human anatomy and medical terms which will serve as the basis for communication in a medical environment.	48 Clock Hours Theory
END103	Clinical Experience I - Introduction	Students will learn how to measure a head using the International 10-20 System, assist with electrode application and removal, and observe the technical steps to obtain a good EEG recording.	40 Clock Hours Lab 128 Clock Hours Clinical Externship
END104	Emergency Preparedness	Explores various types of emergency and disaster scenarios and help students recognize their role as an individual, a member of a community, and as a medical service provider.	12 Clock Hours Theory

Second Term

The second term provides the essentials to understanding neurodiagnostic equipment, procedures, and protocols within the healthcare setting. It introduces students to the neurodiagnostic technology concepts, theories and techniques, and expands the hands-on learning in Clinical Experience II. Student responsibilities increase as they begin to work on patients.

Course Number	Course Name	Course Description	Clock Hours
END201	Instrumentation	Focuses on the electrical concepts and equipment required to obtain an electroencephalographic recording.	48 Clock Hours Theory
END202	EEG Recording Theories & Techniques	Explores core electroencephalograph concepts including pattern recognition, electrode recording arrays, and artifacts.	48 Clock Hours Theory
END203	Clinical Experience II - Intermediate	Students begin conducting supervised adult EEG recordings.	192 Clock Hours Clinical Externship

Neurodiagnostic Technology Institute

Third Term

The third term begins with an in-depth exploration of the human nervous system and the injuries and illnesses that result in neurological problems. Students will learn about infections, epilepsy, tumors, and many other neurological related abnormalities that make neurodiagnostic testing an essential diagnostic tool in healthcare today.

Course Number	Course Name	Course Description	Clock Hours
END301	Clinical Sciences	Focus is on how diseases, seizures, and other neurological disorders affect the brain and the EEG recording.	48 Clock Hours Theory
END302	Neuroanatomy	Explores the anatomy and physiology of the human nervous system and cerebral blood flow.	48 Clock Hours Theory
END303	Clinical Experience III - Advanced	Students continue to harness their skills for adult EEG recordings and will be able to complete a study with minimal supervision.	192 Clock Hours Clinical Externship

Fourth Term

The final term includes in depth study of Pediatric EEGs and how they differ from adult EEGs, an introduction to additional neurodiagnostic technology modalities: including long-term monitoring (LTM), evoked potentials (EP), intraoperative monitoring (IOM), polysomnography (PSG), and nerve conduction studies (NCS); preparation for the American Board of Registration of Electroencephalographic and Evoked Potential Technologists (ABRET) EEG Registration Exam, and the development of skills to aid in career placement.

Course Number	Course Name	Course Description	Clock Hours
END401	Pediatric EEG	Explores pediatric neurological disorders and EEG recordings.	48 Clock Hours Theory
END402	Neurodiagnostic Modalities	Provides an overview of various neurodiagnostic modalities including long term monitoring, evoked potentials, nerve conduction studies, intraoperative monitoring, and polysomnography.	48 Clock Hours Theory
END403	Clinical Experience IV - Professional	Provides students with opportunities to continue to hone their recording techniques, observe additional neurodiagnostic modalities, and the tools needed to begin their job search.	192 Clock Hours Clinical Externship
END404	EEG Registration Exam Preparation	Prepares students to take the American Board of Registration of Electroencephalographic and Evoked Potential Technologists (ABRET) EEG Registration Exam.	12 Clock Hours Theory

METHOD OF INSTRUCTION

Neurodiagnostic Technology Institute recognizes that education is not a one-size-fits-all undertaking. Students learn in a variety of ways. To address this, we have created a hybrid learning environment which blends online education with offline, hands-on experiences to create a learning environment beneficial to all students. Students will meet online with instructors and fellow students to participate in individual and group activities. The topics introduced online will be reinforced offline at the clinical site. At the clinical site, students are under the tutelage of credentialed neurodiagnostic professionals and have the opportunity to engage directly with physicians and other medical staff.

ONLINE LEARNING ENVIRONMENT

Neurodiagnostic Technology Institute's Student Portal is where all student activities take place. The Institute's online learning environment utilizes a cloud-based learning platform which provides an asynchronous learning environment that promotes traditional and social learning to create an engaging virtual classroom. Students from many locations and backgrounds are able to come together online to and interact with instructors and each other.

Within the Student Portal, students will complete and update their profiles; retrieve course materials; submit assignments, quizzes, and tests; attend live record reviews and discussions; receive instructor feedback; and retrieve their grades. Students will be asked to respond to real-life scenarios posed by instructors and to comments made by their classmates. They will have the opportunity to share their thoughts and personal experiences on important topics concerning the medical profession. Open discussions are encouraged. Students may agree, disagree, or provide alternative viewpoints for consideration. Students will be assigned individual and group projects which will require them to work as a team with other students in planning, developing, and presenting the project results.

CLINICAL EXTERNSHIP

Neurodiagnostic Technology Institute works with neurodiagnostic facilities around the country to provide clinical site experience to its students. The clinical externship allows students to experience hands-on learning and work experience in neurodiagnostic labs and clinics that cannot be acquired in a classroom. Students are required to perform a minimum of sixteen (16) hours of clinical externship each week. Students will participate in the daily activities that are typical of the work environment. As knowledge and skills improve, students will perform tasks efficiently and effectively with minimum supervision.

CLINICAL SITE

The Institute assists approved applicants with the identification of approved clinical sites where they can complete their externship. An approved clinical site is a neurological facility that has accepted the student for externship. Approved clinical sites provide students with the opportunity to learn from experienced EEG Technologists and neurologists. Clinical sites aid in the hands-on learning, supervision, testing, and evaluation of students in the clinical aspects of neurodiagnostic technology. Students will spend sixteen (16) hours each week at the clinical site.

DISTRIBUTION OF MATERIALS

The Institute is sensitive to the economic and time challenges involved in the pursuit of education. We strive to help make the process of going back to school easier by providing students with the supplies they need to begin the program. Students are able to minimize the cost of some of their textbooks by renting them via an online service or by purchasing previously owned books. Current and relevant articles and materials will be shared electronically via the Student Portal. Students will be able to download and/or link to online resources with a convenient click of the mouse.

REQUIRED EQUIPMENT

Required equipment and supplies needed to be successful in the online learning environment include:

- Hardware:
 - An Intel i3 or faster processor with a minimum of 8 GB RAM
 - 250 GB hard drive or larger
 - Monitor and video card with minimum resolution of 1024 x 768
 - Audio/speaker capability
 - Access to a laser or inkjet printer
 - Access to an image scanner
 - Photographed images do not meet this requirement

- Software:
 - Microsoft® Windows 10 Home or Professional editions
 - Current Internet Browser (Chrome or Firefox)
 - Microsoft® Office 2010 or later (specifically Word and Powerpoint)
 - Adobe® Reader current version
 - System is enabled to allow installation of browser plug-ins as required
 - Local administrative privileges to operating system may be required
 - Current antivirus software
- Connectivity:
 - Cable or DSL Internet service connection or better
 - Personal email account
 - The ability to upload and download files
- Medical scrubs as prescribed by your chosen clinical site; prices vary based upon manufacturer and location of purchase
- Reliable Transportation

REQUIRED SUPPLIES

The following supplies are sent to all students and are required to complete assignments, take quizzes and tests, and to perform the tasks at the clinical site:

- 150 cm tape measure
- Washable markers
- China Markers
- Anatomically correct Styrofoam head
- Anatomically correct mannequin head with hair + C Clamp

Estimated cost of the Required Supplies is approximately \$50 not including taxes or shipping. Actual cost may vary.

TEXTBOOKS

Textbooks should be purchased prior to attending the first class from the provider of your choice. Students should budget approximately \$644 not including taxes or shipping for the required textbooks listed below. All books are available on Amazon.com.

Required Textbooks

Neuroanatomy through Clinical Cases, 3rd Edition

Hal Blumenfeld, M.D., Ph.D.
Sinauer Associates, 2021. Print.
ISBN: 978-1605359625

The Human Brain Coloring Book

Marian C. Diamond, Arnold B. Scheibel
Collins Reference, 1985.
ISBN: 978-0064603065

Medical Terminology for Health Professions, 8th Edition

Ann Ehrlich and Carol L. Schroeder
Cengage Learning, 2016
ISBN: 978-1305634350

NEURODIAGNOSTIC TECHNOLOGY INSTITUTE

Workbook to Accompany Medical Terminology for Health Professions, 8th Edition

Ann Ehrlich and Carol L. Schroeder

Cengage Learning, 2016

ISBN: 978-1305634367

Introduction to Health Care, 5th Edition

Dakota Mitchell and Lee Haroun

Cengage Learning

**eBook; Must be purchased within the course*

Practical Guide for Clinical Neurophysiologic Testing: EEG, 2nd Edition

Thoru Yamada, M.D., and Elizabeth Meng B.A., R.EEG T., R.EP T.

Lippincott Williams & Wilkins, 2017

ISBN: 978-1496383020

Practical Guide for Clinical Neurophysiologic Testing: EP, LTM, IOM, PSG, and NCS

Thoru Yamada, M.D., and Elizabeth Meng B.A., R.EEG T., R.EP T.

Lippincott Williams & Wilkins, 2009

ISBN: 978-1609137144

Estimated cost of the Textbooks is \$644 not including taxes or shipping. Actual cost may vary. All required books should be purchased from the provider of your choice as soon as possible in order to avoid an interruption to your studies.

PROGRAM COMPETENCIES

Upon completion of the program, the student will be competent in the following theoretical and clinical areas:

- Basic understanding of the history of the electroencephalograph and analog EEG technology.
- Creating a safe recording environment by verifying patient identity, respecting patient confidentiality, following universal safety measures and precautions for infection control, recognizing and responding to life-threatening situations, and understanding and complying with Lab protocols.
- Educating the patient about the EEG recording including: electrode application, activation procedures, the length of the test, and answering patient questions about the recording process.
- Evaluation of the patient's level of consciousness and physical condition to determine electrode placement and application, appropriate activation procedures, the need for additional physiological monitors, and circumstances when restraints or emergency intervention is required.
- Thorough understanding and documentation of patient identity, history, and condition including reason for the test, medications, individual and family medical histories, skull defects and alternate electrode placement, time of the last meal, level of consciousness, behavior, and response to activations.
- Accurate and efficient measurement, application, and removal of scalp electrodes including: compliance with the 10/20 measurement system, effective cleansing of patient's scalp, and electrode application that complies with ACNS guidelines.
- Ensure proper working condition of the digital EEG recording instrument including amplifier and biological calibrations; verification of standard filter settings and sensitivity; and correcting or reporting any deviations.
- Obtain a standard EEG recording which complies with ACNS guidelines including proper setup and recording parameters, activations, montage and filter changes, and appropriate documentation.
- Observation of technical criteria for electrocerebral inactivity, neonates, pediatrics, and intensive care and cardiac care units.
- Identification, elimination, and documentation of artifact waveforms.
- Functional neuroanatomy and neurophysiology including signs, symptoms and EEG correlates for neurological and related psychiatric and psychological disorders.

TUITION & FEES

TUITION

Tuition is payable in full no later than fifteen (15) days prior to the beginning of the next quarter via credit card, check or money orders. Checks and money orders should be made payable to Neurodiagnostic Technology Institute for the exact amount of the tuition and fees due and sent to the address listed below:

Neurodiagnostic Technology Institute
2881 Delaney Avenue, Suite D
Orlando, Florida 32806

A student is not considered officially registered and may not attend classes until all fees and tuition are paid in full or other payment arrangements have been made. Neurodiagnostic Technology Institute will charge the student \$50 fee for each check returned unpaid. Additionally, the student will be required to pay all future fees by money order, certified check, or credit card.

In the event that a student's account is sent to collections, Neurodiagnostic Technology Institute shall be entitled to collection, attorney fees and cost on the account thereof.

TUITION PAYMENT OPTIONS

Tuition to attend Neurodiagnostic Technology Institute is \$9,500. Tuition is paid in advance of course attendance. The Institute is pleased to offer students the following tuition payment plans:

- **One Payment:** A one-time payment of \$9,500 due no later than fifteen (15) days prior to the first class of the first term. This payment includes Required Supplies detailed in the Catalog. It does not include the Required Textbooks, ASET membership, or the Graduation Fee. The Graduation fee is due during the eleventh (11th) month of the Enrollment Agreement. The student is responsible for purchasing the Required Textbooks and ASET membership at his/her own expense. Proof of ASET membership is required in the first quarter.
- **Multiple Payments:** A payment plan of multiple payments equaling \$9,500 is available to those who qualify. The terms of the payment plan will be set forth in the in the Enrollment Agreement. This payment includes Required Supplies detailed in the Catalog. It does not include the Required Textbooks, ASET membership, or the Graduation Fee. The Graduation fee is due during the eleventh (11th) month of the Enrollment Agreement. The student is responsible for purchasing the Required Textbooks and ASET membership at his/her own expense. Proof of ASET membership is required in the first quarter. Payment plans are assessed a \$250 processing fee and require a \$1,000 down payment due at the time of the signing of the Enrollment Agreement.

FEES

Fees are payable in full on or before the date noted in the Terms and Payment section listed below. Fees may be paid via credit card through the Neurodiagnostic Technology Institute web site (www.neurodiagnostictechologyinstitute.com). Checks and money orders for the exact amount of the tuition and fees due should be made payable and sent to the address listed below:

Neurodiagnostic Technology Institute
2881 Delaney Avenue, Suite D
Orlando, Florida 32806

NEURODIAGNOSTIC TECHNOLOGY INSTITUTE

Terms of Payment

Tuition and fees are payable in advance, in full, on or before the dates noted below:

Admission Fees	Due By	Total Amount
Application Fee	Due at the time of Application submission	\$50
Tuition		
One Payment	Fifteen (15) days prior to the first class	\$9,500
Multiple Payments	On or before the first (1 st) day of each month	\$9,500
Other Fees		
Late Payment	Within 30 days of assessment	\$50
Student Membership to ASET – The Neurodiagnostic Society	Ten (10) days after the first class of the first term begins	\$58
Graduation	Thirty (30) days prior to the end of the program	\$100
Unpaid Check		\$50
Request for Transcripts		\$10
Duplicate Diploma Request		\$25

The total cost does not include the ABRET EEG Registration Examination fees or any other regulating agency fees. Textbooks are approximately \$644 not including taxes or shipping. Students are encouraged to seek the best prices at their preferred location. Payment for the background check, drug screening, and immunization tracking required by clinical sites is the responsibility of the student.

Acceptable forms of payment include credit card, checks, and money orders. Checks should be made payable for the exact amount of the tuition and fees due and sent to the address listed below:

Neurodiagnostic Technology Institute
2881 Delaney Avenue, Suite D
Orlando, Florida 32806

TOTAL ESTIMATED EXPENSES

Refundable Fees	Fee
Tuition ¹	\$9,500
Non-Refundable Fees	
Application Fee	\$50
Graduation Fee	\$100
Additional Expenses Paid to Third Parties ^{2, 5}	
Background Check ³	\$60
Drug Test ³	\$46
Immunization Tracking ³	\$35
Textbooks ⁴	\$644
Student Membership to ASET – The Neurodiagnostic Society	\$58
Total Estimated Expenses	\$10,493

1 Tuition includes Required Supplies

2 Amounts shown are estimates and do not include taxes or shipping

3 Applicants are required to use the School's designated provider.

4 Estimate is for new books based on Amazon.com prices as of March 2, 2022, and does not include shipping or taxes. Actual costs may vary.

5 Fees in this section are estimates. Fees are not collected by the School and are subject to each vendors' individual refund policy.

Note: The total cost does not include the ABRET EEG Registration Examination fees or any other regulating agency fees, books or supplies. Payment for ASET - The Neurodiagnostic Society membership, physical examinations, background check, and drug screening are the responsibility of the student. Some clinical sites may require additional paperwork, proof of COVID immunization, mask fit tests, and/or professional liability insurance. The fees for these additional expenses vary by location and are the responsibility of the student.

FINANCIAL ASSISTANCE

Payment of tuition is the responsibility of the student. Failure to provide payment in a timely manner will result in late payment assessments and/or an interruption to or cancellation of the program.

Financial assistance is available to applicants who qualify. The Institute has partnered with TFC Credit Corporation qualified applicants with affordable financing options. Applicants should contact the Admissions department to discuss tuition options so that they can make an informed decision that best suits their needs.

CANCELLATIONS, TERMINATIONS & REFUND POLICIES

Tuition is charged by the quarter and refunded by the quarter. Students are responsible for the payment of all completed and partially completed quarters.

Notifications: A notification is encouraged, but is not required. A student may choose to withdraw from the Institute by officially notifying the Administration Office prior to or on the date of the withdrawal from classes. Notification can be made in person, by email, by Certified Mail or trackable delivery service, or by telephone. Tuition will be refunded in accordance with the Institute's Refund Policy.

Cancellations:

- **Rejection of Applicant:** If an applicant is rejected for enrollment a full refund of all monies paid to the school must be made to the applicant, less a maximum application fee of \$100.
- **Program Cancellation:** If the school cancels a program subsequent to a student's enrollment, the school must refund all monies paid to the school by the student.
- If a student withdraws or fails to attend class before the end of the first week, the student will receive a full refund of all monies paid to the school, less a maximum application fee of \$100.

Causes for Termination: A student's enrollment can be terminated for the following reasons:

- Failure to maintain Satisfactory Academic Progress as defined in the catalog;
- Earning two (2) consecutive absences within one quarter;
- Violation of the Academic and/or Student Conduct policies; and/or
- Failure to make payments in two consecutive installments; and/or
- Expulsion from a clinical site.

All refunds will be made in accordance with the Institute's Refund Policy.

Refund Policies:

Refund Policy:

Application fees will be refunded if the applicant requests a refund within three (3) business days after signing a contract; or if no contract is signed and prior to classes beginning the applicant requests a refund within three (3) business days after making payment. After that timeframe, if the student cancels, the application fee will not be refunded.

Should a conflict exist between the school's refund policy and the policy of the regulating agency of the state where the student resides or the accrediting agency, calculations for both refund policies will be performed and the student will be refunded the greater amount.

Partial Program Completion Refund Policy: Tuition is charged by the quarter and refunded by the quarter. Students are responsible for the payment of all completed and partially completed quarters.

1. Cancellation or termination after attendance has begun, but prior to 60% completion of the quarter, will result in a Pro Rata refund calculated on the number of hours the student has completed to the total number of hours for that quarter.
2. Cancellation or termination after completing 60% of the course will result in no refund for that quarter.

Neurodiagnostic Technology Institute

3. Last Day of Attendance: In calculating the refund due to a student, the last day of attendance is determined by the last documented date the student submitted a graded activity within the LMS.
4. Date of Determination: Refunds will be made within 30 days of termination of students' enrollment or receipt of cancellation notice from student.

Refund Calculation Example: A student enrolled in the Neurodiagnostic Technology program with a start date of January 3rd and forecasted end date of December 26th. Tuition in the amount of \$2,035.71 was paid for the second quarter. The student decides to withdrawal from the program. The Institute is notified of the student's intentions to withdrawal on May 15th. The student's last academically-related activity within the LMS occurred on May 8th.

Tuition Charged:	\$2,035.71
Date of Determination:	5/15/2023
Quarter Start Date:	4/2/2023
Quarter End Date:	6/24/2023
Last Day of Attendance:	5/8/2023

Quarter 2 Partially Complete – Tuition Owed Calculation:

Number of hours student attended:				115
Number of hours financially obligated:				276
Pro rata portion completed =	115	÷	276	41.67%
Pro rata portion completed X Tuition Charged	41.67%	X	\$ 2,035.71	\$848.21

Total Tuition Earned =				\$848.21
Tuition Payment Charged =				\$2,035.71
Tuition Payment Charged - Total Tuition Earned =	\$2,035.71	-	\$848.21	\$1,187.50

Refund due no later than: 6/14/2023

TUITION AND BILLING SERVICES

Student's Fiscal Responsibility

Students are expected to take responsibility for being aware of payment deadlines, policies, and debts owed. Students become responsible for tuition upon registration for classes.

Consequences for Non-Payment

Fiscal Cancellation

Failure to set up a payment plan, pay tuition and fees in full by the end of the designated fee payment deadlines will result in cancellation of the student's registration. Students will be notified by e-mail about their outstanding tuition deficiencies and given an opportunity to pay tuition and fees prior to cancellation. Students whose enrollments are cancelled for non-payment of tuition and fees will have their academic progress discontinued for the term in question and will not be able to attend class or receive grades.

Students whose registrations are cancelled for non-payment of tuition and fees may appeal to the Administration for reinstatement and continuation of academic progress for the term. A written appeal must be submitted to the Administration. Reinstatement requires full payment of all tuition and fees immediately plus any late payment fees.

NEURODIAGNOSTIC TECHNOLOGY INSTITUTE

The Institute reserves the right to deny reinstatement when a demonstrated pattern of tuition deficiencies over two or more months has occurred.

Registration & Transcript Holds

Students with an outstanding balance will receive holds which may prevent future registration, access to academic transcripts, granting of certificates and/or letters of good standing. These holds will not be removed until such debt is paid in full. Payments are applied to a student's account based on the oldest debt first.

Delinquent Accounts/Collections

In accordance with Florida Statutes 1010.03, the Institute is directed to exert every effort to collect all delinquent accounts, including the utilization of a collection agency, restricting the release of transcripts, certificates, and other Institute services. Any student account with a balance in excess of 90 days past due is deemed eligible to be sent to collections. Once a student account is placed with a collection agency the account will be assessed significant collection fees up to 33.33% percent of the original balance as well as all any other fees associated with collecting the debt.

TRANSFER OF CREDITS

TRANSFER OF CREDITS REQUEST – TRANSFERRING IN

Neurodiagnostic Technology Institute reserves the right to accept or deny the transfer of clock hours received from another school. Applicants should make their transfer of credits requests known to their Admissions Advisor during the application process. All requests for transfer of credits must be made prior to the signing of the Enrollment Agreement. Students must submit an official transcript with course syllabi and have earned a minimum grade of 70% or C in a medical or neurodiagnostic technology course within the prior twelve months for a transfer of credit request to be considered. The granting of credit for prior learning in a neurodiagnostic technology field cannot exceed twenty-five percent (25%) of any program. The program and tuition will be adjusted pro-rata according to the number of courses accepted.

TRANSFER OF CREDITS APPEAL PROCESS

The applicant's appeal must be made in writing to the Director of Administration and must be received within ten (10) days of the denial of the request. The applicant's appeal must document and provide sufficient evidence to support the request for reversal. The applicant will be notified of the decision within ten (10) business days of receiving the appeal. The appeal and decision documents will be retained in the applicant's file.

If the applicant prevails upon appeal, the transfer of credit determination will be reversed. If the student does not prevail upon appeal, the student will continue with the same status. No more than one appeal will be granted.

TRANSFER OF CREDITS REQUEST – TRANSFERRING OUT

Students who transfer out of Neurodiagnostic Technology Institute to another educational facility may receive their transcript and course syllabus, providing that all financial obligations to the Institute have been met by the student. The acceptance of the transferability of credits is the decision of the receiving institution.

ACADEMIC CHALLENGE CREDIT

A student may challenge the requirement to complete specific courses in the curriculum by requesting credit for the course based on prior work or educational experience. Academic challenges must be completed prior to the applicant's signing of the Enrollment Agreement. To be eligible for Academic Challenge credit, the student must provide the Institute with official documentation (as determined by the Institute) to validate the prior experience.

A student who wishes to challenge a specific course may request the Institute administers an appropriate course examination to determine the student's retained knowledge. The student will have one opportunity to receive academic credit for a course if the Director of Academics determines that the student has passed the examination with a minimum

grade of 70%. The course will be presented on the student's transcript with a letter grade of 'PR'. If a student receives credit for previous training, the 'PR' credits are included in the maximum time in which to complete and the rate of progress calculations but are not counted in the GPA calculation. No more than twenty-five percent (25%) of total program credits may be awarded as transfer credits, academic challenge credits, or any combination thereof. The decision of the Admissions Advisor regarding transfer of credit and/or academic challenge credit requests is final.

ACADEMIC & STUDENT CONDUCT POLICIES

SATISFACTORY ACADEMIC PROGRESS

Satisfactory Academic Progress (SAP) is calculated based on all courses completed and periods of attendance at Neurodiagnostic Technology Institute. It is applied consistently to all students. Satisfactory Academic Progress is cumulative and is measured quarterly in both attendance and academic performance. It is calculated and reported at the completion of the 25th percent, 50th percent, and 75th percent points of the program. To achieve satisfactory progress, students must:

- maintain a minimum attendance rate of eighty percent (80%) or higher,
- earn a minimum grade point average of a C, 2.0 on a 4.0 scale, or 70% on a 100% scale by the end of the program, and
- complete the program within the Maximum Timeframe. The maximum timeframe for any student to complete the program is one and one-half (1.5) times the program length. The Neurodiagnostic Technology program must be completed within eighteen (18) months.

Attendance and academic performance progress are recorded weekly during the student's period of enrollment and is viewable in the Grades section of each course within the Student Portal. Students must meet the school's attendance standard and the academic performance standard on a quarterly basis to maintain satisfactory progress. Students will be notified quarterly by email of their SAP status.

Course withdrawals and incomplete grades will not be included as part of the grade point average calculation. As long as a student is in compliance with the Maximum Timeframe, he/she has one opportunity to repeat a failed course. The grade from the failed course will be replaced by the grade for the repeated course in the calculation of the grade point average.

Students falling below a threshold will receive a warning, be placed on probation, or be identified as making no progress and will be removed from the program. Students who are removed from the program have the option to reapply to repeat the program after waiting a period of at least three months.

Students who have not completed the course within the maximum timeframe (18 months) will be removed from the Neurodiagnostic Technology program. Students who are removed from the program have the option to reapply to repeat the program after waiting a period of at least three months.

If the student takes an official Leave of Absence by submitting the "Leave of Absence Request Form", their enrollment agreement end date will be adjusted accordingly by the same number of days taken in the leave of absence and also their maximum timeframe is adjusted accordingly.

If a student does not complete the program by the normal time frame, and if the end date has fallen beyond the date which is stated on the student's enrollment agreement upon enrollment, the Institute may charge the student for additional tuition needed to complete the course.

Determination of Progress Status

New students will be determined to be making satisfactory progress from their start dates until the end of the first quarter. Students meeting the minimum requirements for academic performance and attendance at the evaluation point are considered to be making satisfactory academic progress until the next scheduled evaluation.

NEURODIAGNOSTIC TECHNOLOGY INSTITUTE

Students who fail to meet the minimum requirements for academic performance and attendance at the evaluation point are notified via email and are placed on “Warning.” They are considered to be making satisfactory academic progress during the warning period until the next evaluation point.

Students who fail to meet minimum requirements for academic performance and attendance at the next evaluation point after the “Warning” period are notified via email and will be placed on “Probation.” They are considered to be making satisfactory academic progress during the probationary period.

After students have been placed on a “Warning” and “Probation” status, students not meeting the minimum requirements for academic performance and attendance at the evaluation point, are placed on a “No Progress” status. The student will be determined as NOT making satisfactory academic progress.

Students will receive notification via email of their Satisfactory Academic Progress Determination (“Progress”, “Warning”, “Probation” or “No Progress”) at the time of each evaluation. The student will be advised on the actions required to attain satisfactory academic progress by the next evaluation.

Warning

Students who fail to meet any of the progress standards as of an evaluation date will be placed on Warning status. At the end of the “Warning” period, the student must meet the published attendance and academic performance standards to be considered making satisfactory academic progress.

Probation

Students who fail to meet the published standards at the end of the “Warning” period are considered to be not making satisfactory academic progress and will be placed on “Probation” status. Only students who have the ability to meet the Satisfactory Academic Progress Policy standards by the end of the evaluation period may be placed on probation. The student will be advised of the actions required to attain satisfactory academic progress by the next evaluation. If at the end of the probationary period, the student has not met both the attendance and academic performance requirements required for satisfactory academic progress, he/she will be determined as NOT making satisfactory academic progress.

No Progress

Students who are identified as making “No Progress” will be removed from the program.

Appeals

Students who have been designated as not making satisfactory academic progress may appeal the determination with the Institute based on:

- 1) the death of an immediate family member (parent, sibling, spouse, or child),
- 2) an injury or illness of the student, or
- 3) any other allowable special or mitigating circumstance.

The student’s appeal must be made in writing to the Director of Administration and must be received within ten (10) days of the determination of unsatisfactory progress. The student’s appeal must document and provide sufficient evidence of the situation that caused the student to fail to meet the Institute’s standards, as well provide information regarding what conditions have changed that would demonstrate that the student could regain satisfactory academic progress standards if allowed to be restored to the probationary period. Appropriate documentation might include a physician’s statement, accident report, death certificate, or other reports. The student will be notified of the decision within ten (10) business days of receiving the student’s appeal. The appeal and decision documents will be retained in the student file.

If the student prevails upon appeal, the unsatisfactory academic progress determination will be reversed. If the student does not prevail upon appeal due to insufficient documentation, the student will continue with the same status. No more than one appeal may be granted during any one period of enrollment.

Retaking Courses

Students must pass all courses within a quarter before advancing to the next quarter. To retake a failed course, the student must amend the original enrollment agreement if they wish to make another attempt to pass and complete the program. There is a \$678.57 charge per course for any course that needs to be retaken. The program must be completed within the maximum timeframe of 18 months from the start date listed on the original enrollment agreement.

Interruptions and Withdrawals

If enrollment is temporarily interrupted for a Leave of Absence, the student will return to school in the same progress status as that prior to the leave of absence. Time elapsed during a leave of absence will extend the student's contract period and maximum time frame by the same number of days.

Reinstatement

Students who are removed from the program for lack of satisfactory academic progress have the option to apply to repeat be readmitted to the Institute after a waiting period of at least three months. The student's application must explain what circumstances have changed that will allow the student to be successful where they were previously unsuccessful. The Institute will review the request. Requests for reinstatement will be accepted or denied. If accepted, such students will be enrolled on a probationary period upon re-entry. Students who have not maintained satisfactory academic progress can reestablish eligibility by successfully completing sufficient attendance and academic performance required at the next evaluation point. The Institute's decision is final and is not eligible for appeal.

ADMINISTRATIVE DISCRETION

Neurodiagnostic Technology Institute reserves the right to disqualify, discontinue, exclude, or involuntarily withdraw any student from the school at the discretion of the Administration.

ATTENDANCE

Online Attendance

Attendance is critical to the learning process and is determined by the student's weekly submission of graded activities. Graded activities include discussion questions, assignments, tests, exams, and projects. Students are required to attend class a minimum of two (2) separate days every week. Attendance is earned on the day a graded activity is submitted. Participation in weekly discussion questions is one attendance requirement. An additional graded activity must be submitted on a different day within the same week to satisfy this policy.

The acts of logging in to the Student Portal, reading articles, watching videos, reviewing your calendar, sending emails, engaging in chats with other students or your instructor do not qualify as attendance because there is not a grade associated with these activities.

A class is defined as one week of lesson material within the twelve-week course. Each week classes are made available to students on Sundays at 12:01 a.m. Eastern time and close at 11:59 p.m. Eastern time on the following Saturday for all courses. Attendance is recorded in the week in which it occurs. Based on the timeliness of the submission of discussion questions and other academically-related activities, students are marked as Present, Late, or Absent. All academically-related activities submitted after the end of the class (i.e. 11:59 p.m. Eastern time) will be marked as Absent and will be graded in accordance with the Late Work Policy below.

Students are required to maintain an attendance rate of 80% or higher to avoid disciplinary action. Students earning two (2) consecutive absences in a course will be terminated from the course and will be required to repeat the course at an additional expense.

In accordance with the policy on Satisfactory Academic Progress Policy, students must complete the program with eighteen (18) months or be dismissed from the program.

Clinical Site Attendance

Clinical site attendance is earned when students complete and submit proof of the required sixteen (16) hours of clinical externship each week and fulfill the requirements for Online Attendance listed above. Students are expected to arrive on time, fully prepared, and ready to actively participate in learning activities at the Clinical Site.

Students cannot be absent from their clinical site more than two (2) times within one quarter. All clinical hours must be made up to meet graduation requirements. Students exceeding two (2) absences in a course will be subject to disciplinary actions and may be required to repeat the course at an additional expense. In accordance with the policy on Satisfactory Academic Progress, students are required to complete the program within eighteen (18) months or be dismissed from the program.

Clinical Site Behavior

The clinical site is an operational healthcare facility with professional healthcare teams and live patients. Clinical preceptors volunteer their time to train neurodiagnostic technology students. Students must observe all facility protocols which may include, but not be limited to the following: appearance, grooming, parking, security, name badges, etc. Further, students are required to behave professionally, respectfully, and courteously at all times. Students should conduct themselves in a manner that preserves the health and safety of the clinical site staff, other students, patients, and visitors. Clinical sites have the option to expel a student at any time for any reason. Students expelled from a clinical site may, at the discretion of the Administration, be dismissed from the program.

Tardiness & Early Departure

Punctuality is a practice held in high regard by business, society, and the Institute. Students are expected to exhibit this trait in the timely submission of their work and in the completion of their clinical externship hours. In the online environment, tardiness is defined as a late submission for a graded activity. In the clinical environment, tardiness is defined as arriving one (1) minute late to the clinical site's neurodiagnostic lab. Early departure is defined as leaving prior to the end of the clinical shift. Tardiness and early departures are noted in attendance records and are detrimental to the student's grade. Excessive tardiness and/or early departures will result in disciplinary action. Timeliness is a critical component of succeeding in this program and having a successful career.

GRADING

Neurodiagnostic Technology Institute is committed to helping students learn and understand the intricacies of the neurodiagnostic technology profession. Grading practices have been created to provide students with timely feedback designed to improve their performance. Grades will be calculated on the student's performance in homework, quizzes, tests, individual projects; level of participation in group discussions, assignments, and record reviews; attendance; and feedback from clinical site instructors. Grading rubrics for each course can be found in the course syllabus.

Grade	Percentage	GPA
A	90% - 100%	4.0
B	80% - 89%	3.0
C	70% - 79%	2.0
F	0% - 69%	0
I	Incomplete	0
T	Transfer Credits	0
W	Withdrawal	0
X	Audit	0

STUDENT CODE OF CONDUCT

The Student Code of Conduct identifies expected and prohibited behaviors. Students are expected to fully participate in and take ownership of their education. Students who violate the Student Code of Conduct are subject to disciplinary action under the Student Discipline Process Procedures. Criminal acts will be referred to local law enforcement officials.

Recommended Behaviors:

- Be present. Attend all classes and scheduled clinical site externship times.
- Be on time. Submit all assignments prior to the due date. Show up for your clinical externship on time.

Neurodiagnostic Technology Institute

- Be respectful in your words and actions when engaging with fellow students, instructors, NTI and clinical site personnel, patients, and visitors.
- Freely engage and interact with fellow students and your instructors. You will find your learning experience will be much more valuable if you do so.
- Be clean. Maintain personal cleanliness by bathing regularly. Oral hygiene (brushing of teeth) required. Use deodorant/antiperspirant to minimize body odors. Heavily scented perfumes, colognes and lotions should be avoided.
- Observe the dress code rules set forth by the clinical site.

Prohibited Behaviors:

- Violation of clinical site policies.
- Violation of local, state, and/or federal laws.
- Use of mobile communication devices (i.e. mobile phones, smartwatches, headset, headphones, earbuds), for any purpose anytime or anywhere at the clinical site without the clinical preceptor's approval.
- Dishonesty, including lying, cheating, plagiarism, or knowingly furnishing false information to the Institute and its representatives; or intentionally assisting another student to commit a dishonest act.
- Unlawful use, possession, sale or presence at the clinical site while under the influence of alcohol, narcotics, or other controlled illegal substances.
- Assault, battery, any threat of force or violence, physical or verbal abuse, intimidation, harassment, coercion, stalking, hazing and/or other such conduct involving other students; NTI faculty, staff, or administration; or clinical site staff, patients, or visitors.
- Attempted or actual theft or intentional damage to property of the Institute or the clinical site.
- Willful or persistent smoking in any area where smoking has been prohibited by lawful authority.
- Disorderly conduct or lewd, indecent, or obscene conduct or expression.
- Illegal or unauthorized possession, use, or sale of weapons, explosives, firearms, or other dangerous objects or substances which might inflict bodily harm or be used to threaten the health or safety of anyone.
- Persistent disruptive behavior, continued willful disobedience, or the open and persistent defiance of the authority of, or persistent abuse of NTI or clinical site personnel.
- Unauthorized use of computers and/or telecommunication resources, including but not limited to:
 - unauthorized entry into a file to use, read, or change the contents, or for any other purpose;
 - unauthorized transfer of a file;
 - unauthorized use of another individual's identification and password.
- Any form of unlawful discrimination or harassment, including sexual harassment, gender-based harassment and/or sexual assault of any person as defined by state or federal law.
- Use of any camera, audio, video or other listening, recording or transmitting device at any clinical site without the prior consent of the clinical preceptor.
- Any behavior that intentionally or unintentionally jeopardizes the safety or health of other students, NTI personnel, and/or clinical site staff, patients or visitors.

COPYRIGHT POLICY

Neurodiagnostic Technology Institute expects all members of its community to respect the rights of intellectual property ownership by adhering to the United States copyright laws, including amendments made to the laws by the Digital Millennium Copyright Act (DMCA) and the Technology, Education, and Copyright Harmonization (TEACH) Act. The Institute

also expects all members of the community to be mindful of the limited rights conferred on them by the “fair use” exemption and other exclusions to the copyright laws. Failure to observe and abide by these laws can result in disciplinary actions, civil and criminal liabilities.

DRUG & ALCOHOL POLICY

The Institute recognizes the use of drugs and alcohol endangers the lives of students, medical staff, volunteers, patients, and visitors. As such, we have adopted a zero-tolerance policy toward drug and alcohol use. The policy relating to such abuses is designed to be preventative in nature and is intended to help any student having problems with alcohol or drugs.

The Institute is bound by law and it will act in compliance with the law when circumstances indicate certain actions are necessary.

Possession and/or Use: First Offense - Disciplinary Action

Any student found in possession of or under the influence of drugs or alcohol will be solely responsible for the consequences of his or her actions, which may include, but not be limited to a minimum suspension of ninety (90) days from all classes and permanent expulsion from the clinical site or expulsion from the program.

As conditions of continued enrollment, the student, at the student's expense, is required to:

1. meet with a drug/alcohol counselor or psychologist;
2. complete and provide a professional assessment of the drug/alcohol counseling to the Director of Administration;
3. provide a clean drug screen;
4. consent to random drug/alcohol testing for the duration of enrollment;
5. find a replacement clinical site to complete the clinical externship required by the program.

Failure to complete all of the above requirements will prevent the student from resuming the program.

Should the student refuse the recommended professional treatment, (including random drug testing), the school may permanently dismiss the student.

Possession and/or Use: Second Offense Disciplinary Action

Any repeated violation of the school's drug/alcohol policy will result in automatic dismissal.

HARASSMENT

Harassment is the creation of a hostile or intimidating environment in which verbal or physical conduct, because of its severity and/or persistence, is likely to interfere significantly with an individual's work or education. Discriminatory harassment includes conduct directed against any person or group of people that has the purpose or effect of creating an offensive, demeaning, intimidating, or hostile environment for that person or group of people. Complaints of harassment should be reported immediately to the Administration and will be investigated.

LEAVE OF ABSENCE

Students who experience unexpected emergencies such as a serious illness, debilitating injury, or death in the immediate family have the option to request a leave of absence. A leave of absence is a temporary break in a student's attendance during which s/he is considered to be continuously enrolled. A student must submit a written request for a leave of absence in advance of the beginning date of the leave of absence, unless unforeseen circumstances prevent the student from doing so. If a student does not request a leave of absence within a timeframe consistent with the institution's consecutive absence policy, s/he will be withdrawn. The student must sign and date the leave of absence request and specify a reason for the leave. The reason must be identified in order for the Institute to have a reasonable expectation of the student's return within the timeframe of the leave of absence as requested. The student must attest to understanding the procedures and implications for returning or failing to return to his/her course of study. The Institute will not assess the student any additional charges as a result of the leave of absence.

Neurodiagnostic Technology Institute

A student may be granted a leave of absence for up to 90 days in any twelve (12) month period. The number of days in a leave of absence commences the day after the student's last day of attendance. The twelve (12) month period begins on the first day of the student's initial leave of absence. Upon the student's return from the leave of absence, the student is permitted to complete the coursework begun prior to the leave of absence without any penalties. A student may take a subsequent leave of absence if it does not exceed ninety (90) days and the Institute determines that the subsequent leave of absence is necessary due to unforeseen circumstances.

If a student does not resume attendance at the Institute on or before the end of a leave of absence, the student will be considered to have withdrawn from the program.

MAKE-UP WORK

Students who have been absent from class for any reason are required to make-up missed assignments, quizzes, and tests within one week to receive credit for the work. All externship hours that are missed must be made-up prior to the beginning of the next quarter.

NON-DISCRIMINATION

Neurodiagnostic Technology Institute does not discriminate or tolerate harassment in its educational programs or activities for any reason, including race, religion, gender, color, age, national or ethnic origin, political beliefs, marital status, disability, sexual orientation, gender identity, socioeconomic status or family background. Complaints of discrimination will be treated and investigated with full regard for the Institute's due process requirements.

PROGRESS EVALUATIONS

Students have access to view their grades within the student portal. Quarterly grades will be emailed to the address contained in the student's academic file.

SEXUAL HARASSMENT

Sexual harassment is prohibited. Sexual harassment includes unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature when submission to unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature is made either explicitly or implicitly a term or condition of a student's status in a course, program, or activity. Complaints of sexual harassment should be immediately reported to the Administration and will be investigated.

DISCIPLINARY MEASURES

Determination of Progress Status

New students will be determined to be making satisfactory progress from their actual starting date until the end of the first quarter. Students meeting the minimum requirements for academics and attendance at the evaluation point are considered to be making satisfactory academic progress until the next scheduled evaluation.

Students who fail to meet minimum requirements for academics and attendance at the evaluation point are placed on "Warning" and considered to be making satisfactory academic progress while during the warning period until the next scheduled evaluation.

Students who fail to meet minimum requirements for academics and attendance at the evaluation point after the "Warning" period will be placed on "Probation" and considered to be making satisfactory academic progress while during the probationary period, if the student appeals the decision, and prevails upon appeal.

After a student has been placed on a "Warning" or "Probation" status, students not meeting the minimum requirements for academics and attendance at the evaluation point, are placed on "No Progress" and the student will be determined as NOT making satisfactory academic progress. Students will receive a hard-copy of their Satisfactory Academic Progress Determination ("Progress", "Warning", "Probation" or "No Progress") at the time of each of the evaluations. The student will be advised in writing on the actions required to attain satisfactory academic progress by the next evaluation.

Warning

Students who fail to meet either of the two progress standards as of an evaluation date will be placed on Warning status. At the end of the “Warning” period, the student must meet the published attendance and academic performance standards to be considered making satisfactory academic progress.

Probation

Any student who fails to meet the published standards at the end of the “Warning” period is considered as not making satisfactory academic progress unless the student submits a written appeal in accordance with this policy as is granted “Probation”. Only students who have the ability to meet the Satisfactory Academic Progress Policy standards by the end of the evaluation period may be placed on probation. Students making progress according to their specific academic plan will be considered making Satisfactory Academic Progress during probation. The student will be advised in writing of the actions required to attain satisfactory academic progress by the next evaluation. If at the end of the probationary period, the student has still not met both the attendance and academic requirements required for satisfactory academic progress, he/she will be determined as NOT making satisfactory academic progress.

ACADEMIC WARNING

Satisfactory Academic Progress is evaluated monthly. Students who fail to meet minimum requirements for academics and attendance at the evaluation point are placed on Academic Warning and given the opportunity to make satisfactory academic progress during the warning period until the next scheduled evaluation. At the end of the Academic Warning period, the student must meet the published attendance and academic performance standards to be considered making satisfactory academic progress.

Students who continue to fail to meet the minimum requirements for academics and attendance at the evaluation point are placed on Academic Probation and are given the opportunity to improve their performance until the next scheduled evaluation.

ACADEMIC PROBATION

Students who fail to improve their academic and/or attendance performance after being placed on Academic Warning will be placed on Academic Probation and given the opportunity to improve their performance during the probation period until the next scheduled evaluation. At the end of the Academic Probation period, students must meet the published attendance and academic performance standards to be considered making satisfactory academic progress.

Students who continue to fail to meet the minimum requirements for academics and attendance at the evaluation point are at risk for repeating the course at an additional expense and/or academic termination.

ACADEMIC TERMINATION

Academic Termination is the separation of students from the Institute. Academic Termination occurs after a student fails to make Satisfactory Academic Progress after being placed on Academic Probation. Additionally, students may be dismissed, at the discretion of the Administration, for the following reasons:

- Failure to maintain Satisfactory Academic Progress;
- Exceeds two (2) consecutive absences within one quarter;
- Violation of the Academic and/or Student Conduct policies;
- Failure to make payments for two consecutive installments; and/or
- Expulsion from a clinical site.

Students are eligible to re-apply for enrollment after waiting a minimum of three (3) months after the termination. This request will be on a petition basis. In order for re-enrollment to be approved, the petition must present evidence of a change in the student's circumstances which will allow him/her to overcome the previous challenge.

CODE OF CONDUCT DISCIPLINE

The purpose of the disciplinary process is to provide a fair review of alleged violations of the Code of Conduct in lieu of a formal legal proceeding. Participation of persons acting as legal counsel is not permitted. Any NTI student, faculty,

Neurodiagnostic Technology Institute

administrative, or staff member, or clinical site staff member may submit a formal complaint against a student alleging that a violation has taken place. Alleged violations will be investigated by the Administrative office and an appropriate disciplinary action will be applied. Approved disciplinary actions include, but are not limited to the following:

- **Warning:** A verbal or written reprimand to the student indicating that repetition of said act will be cause for further disciplinary action;
- **Disciplinary Probation:** Placing the student on notice that a repetition of this or other misbehavior will be grounds for more serious disciplinary action;
- **Restitution:** Repayment to the Institute or others affected for damages resulting from a Code of Conduct violation;
- **Suspension:** Exclusion from the clinical site for a period of time as set forth in the notice of suspension.
- **Termination:** Permanent dismissal of student status.
- **Other:** Other types of reasonable penalties consistent with the incident involved, such as a letter of apology to the aggrieved party(ies), a reflective learning statement, etc.

REQUEST TO APPEAL TERMINATION

This process serves both academic and code of conduct terminations. Requests to appeal must be submitted in writing to the Director of Administration within five (5) business days upon receipt of notification of termination. The written appeal must include an explanation for reconsideration of the decision. The appeal must include as much supporting information as possible, including substantiating documentation. Information may not be solicited from another student or staff. Appeals must be dated and signed by the student.

The Administration will review and carefully consider all requests. The Administration has the power to make a decision in support of or against termination after consideration of all facts. A letter containing the Administration's decision will be sent to the student within ten (10) business days after receipt of the request.

The decision of the Administration is final. Documentation of the appeal and the decision will be retained as part of the student's permanent file.

RE-ADMISSION

Students are eligible to re-apply for enrollment after waiting a minimum of three (3) months after the termination. Students terminated from the Institute may reapply through the standard Admissions process. A student must submit a new application, including fees to the Admissions Office. If the dismissal was based on a failure to pay tuition, the amount owed must be paid prior to reinstatement. A committee will review all requests for re-admission. The Admissions Office will inform the student of the decision with an official letter of re-admission or denial. Students admitted will be re-evaluated and may be required to repeat all courses completed more than one year prior unless the student demonstrates current competencies deemed acceptable by the Director of Academics.

STUDENT COMPLAINTS & GRIEVANCES

Neurodiagnostic Technology Institute recognizes the benefits in resolving student complaints or grievances in a fair and timely manner. The Institute has established the following escalating process to assist in the resolution of student complaints and grievances.

LEVEL ONE: DIRECT DISCUSSION FOR RESOLUTION

The student initiates a conversation to raise awareness of the issue and seek resolution with the person against whom the grievance is lodged. Its purpose is to provide an opportunity for quick resolution at the local level.

LEVEL TWO: ADMINISTRATIVE INVESTIGATION

Students not satisfied with the outcome resulting from Level One conversations have five (5) business days to escalate their complaint by sending a formal written complaint by certified mail or email to the Director of Academics which contains the following items:

- a clear statement of the issue
- all the relevant facts surrounding the issue
- the preferred resolution the student is seeking.

The Director of Academics will initiate an investigation within ten business days of receipt of the student's complaint. This investigation will include interviews with the student, the individual against whom the complaint has been made, and others.

The Director of Academics will make a decision and share the results in writing via certified mail and/or email with the student and the individual against whom the complaint has been made within three business days upon concluding the investigation.

LEVEL THREE: REQUEST FOR APPEAL

Students dissatisfied with the resolution to their grievance offered at Level Two have the option to request an appeal by sending a formal written complaint by certified mail or email to the Director of Administration within five (5) business days after receiving the resolution offered for Level Two. If the appeal application is accepted, the complaint will be reviewed and reconsidered by a committee of no fewer than three members of the Faculty and Administration. Decisions pertaining to the request for appeal will be communicated within fifteen (15) business days by certified mail and/or email.

If the student is dissatisfied with the outcome, the only avenue for review or appeal is external. No further internal review or appeal is available.

LEVEL FOUR: EXTERNAL REVIEW

Students have the right to seek external assistance to resolve their issue by filing a complaint with the governing agency for their state of residence listed below:

State	Governing Agency
Florida	The Commission for Independent Education 325 West Gaines Street, Suite 1414 Tallahassee, Florida 32399 Telephone: 1-888-224-6684 If the Institute receives notification of formal external inquiry, the application of the resolution process stated above will be suspended until the external inquiry is complete.
Georgia	Georgia NonPublic PostSecondary Education Commission 2082 East Exchange Place Suite 220 Tucker, GA 30084 (770) 414-3300 GNPEC Student Complaints https://gnpec.georgia.gov/student-resources/student-complaints

NOTICE TO STUDENTS: ACCET COMPLAINT PROCEDURE

This institution is recognized by the Accrediting Council for Continuing Education & Training (ACCET) as meeting and maintaining certain standards of quality. It is the mutual goal of ACCET and the institution to ensure that educational training programs of quality are provided. When issues or problems arise, students should make every attempt to find a

Neurodiagnostic Technology Institute

fair and reasonable solution through the institution's internal complaint procedure, which is required of ACCET accredited institutions and frequently requires the submission of a written complaint. Refer to the institution's written complaint procedure which is published in the institution's catalog or otherwise available from the institution, upon request. Note that ACCET will process complaints which involve ACCET standards and policies and, therefore, are within the scope of the accrediting agency.

In the event that a student has exercised the institution's formal student complaint procedure, and the problems or issues have not been resolved, the student has the right and is encouraged to take the following steps:

1. Complaints should be submitted in writing (by email or mail) to the ACCET office. Complaints received by phone will be documented, but the complainant will be requested to submit the complaint in writing.
2. The letter of complaint must contain the following information:
 - a. Name and location of the ACCET institution;
 - b. A detailed description of the alleged problem(s);
 - c. The approximate date(s) that the problem(s) occurred;
 - d. The names and titles/positions of all individual(s) involved in the problem(s), including faculty, staff, and/or other students;
 - e. What was previously done to resolve the complaint, along with evidence demonstrating that the institution's complaint procedure was followed prior to contacting ACCET;
 - f. The name, email address, telephone number, and mailing address of the complainant. If the complainant specifically requests that anonymity be maintained, ACCET will not reveal his or her name to the institution involved; and
 - g. The status of the complainant with the institution (e.g. current student, former student, etc.).
3. In addition to the letter of complaint, copies of any relevant supporting documentation should be forwarded to ACCET (e.g. student's enrollment agreement, syllabus or course outline, correspondence between the student and the institution).
4. SEND TO: ACCET
CHAIR, COMPLAINT REVIEW COMMITTEE
1722 N Street, NW
Washington, DC 20036
Telephone: (202) 955-1113
Email: complaints@accet.org
Website: www.accet.org

Note: Complainants will receive an acknowledgement of receipt within 15 days.

GRADUATION REQUIREMENTS

In order to be eligible for graduation and receive a certificate, students must fulfill the following requirements:

- Receive passing grades in all courses
- Achieve and maintain a minimum GPA of 2.0 or higher
- Maintain satisfactory academic progress standards
- Satisfy all financial obligations
- Complete 100% of clinical externship hours and pass all competency requirements
- Complete a minimum of 100 routine EEG recordings as defined by ABRET

ABRET EEG REGISTRY EXAM

The Institute's Neurodiagnostic Technology program is an ABRET approved Pathway II route for graduates to become eligible to take the Registration for Electroencephalographic Technologists exam. Although neurodiagnostic technologists are not required to be credentialed to obtain employment in the field, there are many advantages to becoming a Registered EEG Technologist (R. EEG T.), including increased marketability, an established level of competency, and respect from other professionals within the field. Contact the administrative office for more information about earning your R. EEG T.

STUDENT SERVICES

Neurodiagnostic Technology Institute is committed to the education and success of its students by providing the following Student Services:

ACADEMIC ADVISEMENT

Faculty closely monitor student performance and will perform academic advisement as needed.

LIBRARY & LEARNING RESOURCES

Membership to ASET- The Neurodiagnostic Society provides students with access to the group's library of current and historical industry news, journal articles, and events. Student membership to ASET – The Neurodiagnostic Society is \$58 per year. Students will also utilize free, nationally-recognized medical web sites including the American Clinical Neurophysiology Society, National Institutes of Health, Center for Disease Control and Prevention, and Medscape. Students are encouraged to use free, online, reference tools such as The MacMillan Dictionary, EasyBib, and other helpful web sites.

CAREER SERVICES

Graduates of the Institute will successfully achieve the knowledge and skills necessary to pass the American Board of Registration of Electroencephalographic and Evoked Potential Technologists (ABRET) EEG Registration Exam and enter the neurodiagnostic technology field. According to the Neurodiagnostic Profession Salary and Benefits Report published by ASET – The Neurodiagnostic Society, Registered EEG Technologists have an average starting salary ranging from \$38,000 - \$49,500. On average Registered EEG Technologists earn a salary of \$55,000 per annum.

In addition to providing students with the knowledge and skills necessary to seek employment as neurodiagnostic technicians before testing to become Registered EEG Technologists, the Neurodiagnostic Technology Institute provides students with guidance in basic résumé preparation, job search strategies, and interview skills. While we cannot guarantee a job for you, we can equip you with the tools needed to find one. Your success is our greatest achievement.

MEASUREMENTS & METRICS

Neurodiagnostic Technology Institute provides smaller class sizes to provide our students with more one-to-one interactions with their instructors. Graduates of the program are able to become employed in the Neurodiagnostic Technology field without taking the ABRET EEG Registry Exam. Although all graduates are encouraged to take the exam, not all graduates choose to do so. Because of the small class size and the choice of graduates to take or not take the ABRET EEG Registry exam, the numbers below can be greatly affected by the performance of one or two students. Neurodiagnostic Technology Institute reported the following metrics for students who graduated in the State of Florida:

Year	Retention Rate	Placement Rate	EEG Registry Exam Pass Rate
2018	100%	92%	86%
2019	81%	88%	88%
2020	81%	83%	78%
2021	84%	79%	75%

Additionally, in 2021, all of the individuals who passed the ABRET EEG Registration Exam Pass Rate were able to pass on their first attempt.

STUDENT EVALUATIONS

Neurodiagnostic Technology Institute strives to hire instructors who inspire students and offer quality neurodiagnostic technology educational materials. Students are regularly given the opportunity to share their insights with the Administration about their experiences within each class. Constructive feedback ensures that we continue to deliver a quality educational experience to current and future students.

STUDENT QUESTIONS

The flexibility of an online learning environment offers students a variety of ways to request assistance including phone, email, chat, and online forums. Students can expect to receive a response to their questions and comments in accordance with the following:

Type of Question	Contact	Response Time
Administrative	407-601-7832 Tanya@MyNTIcareer.com	1 Business Day
Academic	Refer to course syllabus	24 Hours
Technical	407-601-7832	24 Hours

STUDENT NOTIFICATIONS

Students will be notified of changes made at the Institution.

STUDENT RECORDS

The Administrative Office is responsible for preserving all official student academic records in perpetuity. Copies can be made available to students upon individual request. It provides both official and unofficial copies of student academic records to students or other individuals, institutions or agencies upon written request from students.

Family Educational Rights and Privacy Act (FERPA)

The Family Educational Rights and Privacy Act of 1974 (FERPA) guarantees that the academic records for students over 18 years old cannot be discussed with anyone except the student or authorized Institute personnel. However, certain information classified as "Directory Information" is available for public consumption unless the student specifically directs that it be withheld. Public Directory Information as defined by the act includes: Student's name, addresses (campus, home, e-mail), telephone listings, photograph, date and place of birth, major field of study, class year, participation in officially recognized activities, dates of attendance, enrollment status, certificates, honors, and awards received, and the most recent previous educational institution attended.

To request that directory information be withheld, please contact the Administration Office.

FERPA affords students certain rights with respect to their education records. They are:

- The right to inspect and review the student's education records within 45 days of the day the Institute receives a request for access.

Students should submit to the academic department or other appropriate official, written requests that identify the record(s) they wish to inspect. The Institute official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the Institute official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

- The right to request the amendment of the student's education records that the student believes are inaccurate or misleading.

Students may ask the Institute to amend a record that they believe is inaccurate or misleading. They should write the Institute official responsible for the record, clearly identifying the part of the record that they want changed, and specify why it is inaccurate or misleading. If the Institute decides not to amend the record as requested by the student, the Institute will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

- The right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent.

One exception that permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person employed by the Institute in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the Institute has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.

- The right to file a complaint with the U.S. Department of Education concerning alleged failure by Neurodiagnostic Technology Institute to comply with the requirements of FERPA.

The name and address of the office that administers FERPA is:

Family Policy Compliance Office
U.S. Department of Education
600 Independence Avenue, SW
Washington, DC 20202-4605

Federal and State Data Collection and Use

As of January 3, 2012, the U.S. Department of Education's FERPA regulations expand the circumstances under which student education records and personally identifiable information (PII) contained in such records—including Social Security Number, grades, or other private information—may be accessed without student consent. First, the U.S. Comptroller General, the U.S. Attorney General, the U.S. Secretary of Education, or state and local education authorities ("Federal and State Authorities") may allow access to records and PII without student consent to any third party designated by a Federal or State Authority to evaluate a federal- or state-supported education program. The evaluation may relate to any program that is "principally engaged in the provision of education," such as early childhood education and job training, as well as any program that is administered by an education agency or institution. Second, Federal and State Authorities may allow access to education records and PII without student consent to researchers performing certain types of studies, in certain cases even when Authorities object to or do not request such research. Federal and State Authorities must obtain certain use-restriction and data security promises from the entities that they authorize to receive PII, but the Authorities need not maintain direct control over such entities. In addition, in connection with Statewide Longitudinal Data Systems, State Authorities may collect, compile, permanently retain, and share without student consent PII from education records, and they may track participation in education and other programs by linking such PII to other personal information obtained from other Federal or State data sources, including workforce development, unemployment insurance, child welfare, juvenile justice, military service, and migrant student records systems.

TECHNICAL SUPPORT

Technical support is available when you need it. Please contact the Technical Support Team if you experience a problem in accessing part of all of the Student Portal. A technical support agent is available online or by phone 24 hours per day, every day.

TUTORING

Students who need the additional assistance of a tutor are encouraged to discuss their problem with the course instructor. The instructor and student will explore tutoring options available to the student. Instructor tutoring sessions are available to the student at no additional cost.

STATE-SPECIFIC POLICIES & DISCLOSURES

The following policies, disclosures, and requirements are state specific and apply only to the residents of that state. Should a conflict exist between the aforementioned policies, disclosures, and requirements and the following state specific policies, disclosures, and requirements, the following state specific policies, disclosures and requirements will prevail.

CALIFORNIA RESIDENTS

California Student Tuition Recovery Fund

You must pay the state-imposed assessment for the Student Tuition Recovery Fund (STRF) if all of the following applies to you:

1. You are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition either by cash, guaranteed student loans, or personal loans, and
2. Your total charges are not paid by any third-party payer such as an employer, government program or other payer unless you have a separate agreement to repay the third party.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if the following applies:

1. You are not a California resident, or are not enrolled in a residency program.

The State of California created the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic losses suffered by students in educational programs who are California residents, or are enrolled in a residency programs attending certain schools regulated by the Bureau for Private Postsecondary and Vocational Education.

You may be eligible for STRF if you are a California resident or are enrolled in a residency program, prepaid tuition, paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The school closed before the course of instruction was completed.
2. The school's failure to pay refunds or charges on behalf of a student to a third party for license fees or any other purpose, or to provide equipment or materials for which a charge was collected within 180 days before the closure of the school.
3. The school's failure to pay or reimburse loan proceeds under a federally guaranteed student loan program as required by law or to pay or reimburse proceeds received by the school prior to closure in excess of tuition and other costs.
4. There was a material failure to comply with the Act or this Division within 30 days before the school closed or, if the material failure began earlier than 30 days prior to closure, the period determined by the Bureau.
5. An inability after diligent efforts to prosecute, prove, and collect on a judgment against the institution for a violation of the Act.

GEORGIA RESIDENTS

Filing a Complaint:

Georgia residents may file a complaint by contacting the Georgia Nonpublic Postsecondary Education Commission (GNPEC). The GNPEC requires that students utilize and complete the institution's established grievance procedure in an attempt to resolve any complaint or concern before submitting a complaint. If the institution's resolution is not satisfactory, a student may then request appeal to GNPEC, but it will not investigate a complaint unless the student has exhausted all available grievance procedures outlined in this document by the institution. The Georgia Nonpublic Postsecondary Education Commission may be reached at:

STATE OF GEORGIA
NONPUBLIC POSTSECONDARY EDUCATION COMMISSION
2082 East Exchange Place, Suite 220
Tucker, Georgia 30084-5305

Office: (770) 414-3300

INDIANA RESIDENTS

This institution is regulated by:

Indiana Department of Workforce Development
Office for Career and Technical Schools
10 N Senate Avenue, Suite SE 308
Indianapolis IN 46204
OCTS@dwd.in.gov
<http://www.in.gov/dwd/2731.htm>

Refund Policy:

1. A student is entitled to a full refund if one (1) or more of the following criteria are met:
 - (a) The student cancels the enrollment agreement or enrollment application within six (6) business days after signing.
 - (b) The student does not meet the postsecondary proprietary educational institution's minimum admission requirements.
 - (c) The student's enrollment was procured as a result of a misrepresentation in the written materials utilized by the postsecondary proprietary educational institution.
 - (d) If the student has not visited the postsecondary educational institution prior to enrollment, and, upon touring the institution or attending the regularly scheduled orientation/classes, the student withdrew from the program within three (3) days.
2. A student withdrawing from an instructional program, after starting the instructional program at a postsecondary proprietary institution and attending one (1) week or less, is entitled to a refund of ninety percent (90%) of the cost of the financial obligation, less an application/enrollment fee of ten percent (10%) of the total tuition, not to exceed one hundred dollars (\$100).
3. A student withdrawing from an instructional program, after attending more than one (1) week but equal to or less than twenty-five percent (25%) of the duration of the instructional program, is entitled to a refund of seventy-five percent (75%) of the cost of the financial obligation, less an application/enrollment fee of ten percent (10%) of the total tuition, not to exceed one hundred dollars (\$100).

NEURODIAGNOSTIC TECHNOLOGY INSTITUTE

4. A student withdrawing from an instructional program, after attending more than twenty-five percent (25%) but equal to or less than fifty percent (50%) of the duration of the instructional program, is entitled to a refund of fifty percent (50%) of the cost of the financial obligation, less an application/enrollment fee of ten percent (10%) of the total tuition, not to exceed one hundred dollars (\$100).
5. A student withdrawing from an instructional program, after attending more than fifty percent (50%) but equal to or less than sixty percent (60%) of the duration of the instructional program, is entitled to a refund of forty percent (40%) of the cost of the financial obligation, less an application/enrollment fee of ten percent (10%) of the total tuition, not to exceed one hundred dollars (\$100).
6. A student withdrawing from an institutional program, after attending more than sixty percent (60%) of the duration of the instructional program, is not entitled to a refund.

Student Complaint Process:

If the student remains unsatisfied after the administrative review, Indiana students can go to OCTS' website (<http://www.in.gov/dwd/2731.htm>) to file a complaint.

IOWA RESIDENTS

The following refund policy will need to go into effect for Iowans who enroll on or after July 1, 2021:

- 1) A full refund of tuition charges shall be made to a student who withdraws within the first two calendar weeks of instruction.
- 2) A pro rata refund of tuition charges shall be made to a student who terminates from any program or course after the first two calendar weeks in an amount that is not less than ninety-five percent of the amount of tuition charged to the student multiplied by the ratio of the number of calendar days remaining in the quarter to the total number of calendar days in the quarter.

Pro rata refunds are calculated in the following manner:

$$\begin{array}{r} \text{(# of calendar days** remaining in the period*)} \\ \hline \text{(total # of calendar days** in the period*)} \\ \times \\ \$\text{xxxx (tuition charge for the period*)} \\ \hline \text{Minimum Tuition Charge Refund/Reduction to the Student} \end{array}$$

If a terminating student has completed sixty percent or more of a quarter, the school is not required to refund tuition charges to the student.

3) Tuition charges assessed to the student at the beginning of each quarter shall be refunded on the amount of tuition costs charged for the quarter in which the student terminated. The School shall not base its tuition refund calculation on any portion of program that remains after a student terminates, unless the student was charged for that remaining portion of the program before the student's termination and the student began attendance in the school term or course.

4) If a student terminates after the first two calendar weeks due to the student's physical incapacity or, for a program that requires classroom instruction, due to the transfer of the student's spouse's employment to another city, the terminating student shall receive a refund of the tuition charges in an amount that equals the amount of

Neurodiagnostic Technology Institute

tuition charged to the student multiplied by the ratio of the remaining number of calendar days in the school period to the total number of calendar days in the school period.

5) A refund of tuition charges shall be provided to the student within forty-five days following the date of the school's determination that a student has terminated from the program.

6) A student who terminates a postsecondary educational program shall not be charged any fee or other monetary penalty for terminating the program, other than a reduction in tuition refund as specified above.
